- Python(Numpy, Matplotlib, Pandas)
- Python Django
- JavaScripts
- Java
- Java Swing
- C
- HTML5/CSS
- Bootstrap
- AWS
- Microsoft Azure
- Version Control(Git/ Github)
- MySQL
- PostgreSQL
- SQLite

## Projects

---

- **Full-Stack eCommerce Web Application:** Built using Python Django and SQLite database. Developed features such as user authentication, product management, and shopping cart.
- **Weather App:** Utilized OpenWeather API, JavaScript, PHP, and MySQL to create a dynamic app displaying current weather conditions.
- **Course Management System:** Developed in Java Swing with MySQL backend, including functionalities for course registration and student management.
- **Blog Site:** Created using Python Django, allowing user to create, update and delete blogposts.
- **Event Management System:** Implemented Python Django, where registered user/organization can create an event.
